Professional Summary

Senior Data Analyst with 7.5+ years of experience across healthcare, commercial, telecom, BI reporting, and data analytics. Skilled in SQL, Python, Snowflake, Tableau, Power BI, ETL/ELT workflows, KPI design, data validation, and stakeholder-facing insight generation.

Experienced in translating business requirements into reliable data models, dashboards, reporting workflows, and decision-support solutions, while partnering with business and technical stakeholders to define data problems, translate requirements into metrics and analytical datasets, build dashboards, investigate trends, and deliver decision-ready insights. Currently serving as team lead on a healthcare/commercial analytics project and working on Agentic AI and LLM-assisted analytics workflows involving LangSmith, prompt engineering, and structured output evaluation.

Career Highlights

- Serving as team lead on a healthcare/commercial analytics project, supporting delivery ownership, issue resolution, quality assurance, and cross-functional collaboration.
- Developed complex SQL logic, KPI calculations, reporting datasets, and analytical layers supporting large-scale business intelligence, operational reporting, and analytics initiatives.
- Developed Tableau dashboards and BI reporting solutions used by 300+ stakeholders for KPI tracking, business reporting, performance monitoring, and operational insights.
- Reduced manual reporting effort by 80% by automating data loading, refresh processes, and recurring reporting workflows using Python, SQL, Pandas, and SQLAlchemy.
- Reduced dashboard refresh failures by 60% through improved pipeline design, validation checks, monitoring, bottleneck investigation, and data quality controls.
- Received a Best Project in Innovation category nomination for building an internal operational data maintenance tool used by cross-functional telecom operations teams.

Core Skills

- **SQL:** CTEs, window functions, aggregations, query debugging, and KPI logic.
- **Data Platforms:** Snowflake, SQL Server, MySQL, and PostgreSQL.
- **Data Modeling:** Analytical data models, reporting layers, and dashboard-ready datasets.
- **BI & Visualization:** Tableau, Tableau Server, Power BI, and executive dashboards.
- **ETL/ELT & Automation:** Python, Pandas, SQLAlchemy, and automated reporting workflows.
- **Analytics:** KPI design, trend analysis, forecasting support, segmentation, and revenue analysis.
- **AI-Assisted Analytics:** LangSmith, prompt engineering, and structured output evaluation.
- **Stakeholder Collaboration:** Requirement gathering, metric documentation, workflow documentation, cross-functional communication, blocker identification, ownership, and delivery coordination.
- **Delivery & Leadership:** Team leadership, Agile delivery, UAT support, mentoring, and blocker resolution.
- **Domain Experience:** Healthcare analytics, commercial analytics, telecom KPI analytics, and marketing analytics.

Professional Experience

Streams Tech Ltd.

Senior Data Analyst | Previously Software Engineer / Data Analyst

Mar 2022 – Present

Dhaka, Bangladesh

Senior Data Analyst

Jan 2025 – Present

- Lead delivery activities for a healthcare and commercial analytics assistant project, coordinating with developers, QA, BA, Scrum Master, Product Manager, and cross-functional stakeholders.
- Translate business problems into analytical and technical requirements by reviewing business logic, validating structured outputs, and aligning data-driven results with stakeholder needs.
- Design and evaluate Agentic AI and LLM-assisted analytics workflows, focusing on prompt quality, structured output validation, and medical data applications.
- Own complex analytical and technical tickets by identifying root causes, resolving dependencies, validating outputs, and balancing delivery speed with long-term maintainability.
- Improve KPI accuracy and reporting reliability through anomaly checks, reconciliation, business logic review, traceability analysis, and release validation.
- Investigate data and reporting issues, validate fixes, review impacted outputs, document findings, and coordinate resolution with technical teams.

- Designed Snowflake data models, KPI frameworks, BI reporting datasets, and dashboard-ready analytical layers by translating business requirements into SQL logic and scalable metric definitions.
- Developed and managed Tableau dashboards used by 300+ stakeholders across Europe for KPI tracking, business reporting, performance monitoring, operational insights, and trend analysis.
- Built and maintained ETL/ELT pipelines using Python, Pandas, SQLAlchemy, and SQL to support data transformation, reporting datasets, and dashboard refresh workflows.
- Reduced dashboard refresh failures by 60% through improved pipeline design, validation checks, monitoring, bottleneck investigation, and reliability improvements.
- Increased reporting trust through source-to-report validation, discrepancy investigation, data quality review, and coordination with development and QA teams.

MILVIK Bangladesh Ltd.

Commercial Analyst

Dec 2020 – Feb 2022

Dhaka, Bangladesh

- Analyzed customer, campaign, revenue, usage, and operational datasets using SQL Server, Excel, Tableau, and Python to support commercial decision-making.
- Delivered insights on revenue trends, customer behavior, campaign performance, segmentation, and commercial performance to support marketing and product decisions.
- Built and maintained ETL/ELT workflows using Python, Pandas, SQLAlchemy, and SQL to automate data loading, refresh processes, and recurring reporting, reducing manual reporting effort by 80% and improving reporting consistency.
- Automated recurring commercial reports covering customer behavior, revenue tracking, campaign performance, monthly forecasting, and reconciliation.
- Identified anomalies, data inconsistencies, performance trends, and reporting gaps through SQL analysis, validation checks, reconciliation, and stakeholder review.

Summit Communications Ltd.

System Engineer

Oct 2019 – Dec 2020

Dhaka, Bangladesh

- Automated complex manual operational tasks by developing web-based tools using Python, Django, SQL, MySQL, and Bootstrap.
- Built an internal technical data maintenance tool used daily by approximately 50 users across Gateway Operations, NOC, Billing, and related departments, earning a Best Project in Innovation category nomination.
- Prepared customer behavior and growth reports covering newly added clients, discontinued clients, bandwidth changes, and positive/negative growth segments.

Bangla Trac Communications Ltd.

Network Engineer

Oct 2018 – Sep 2019

Dhaka, Bangladesh

- Performed SQL-based telecom traffic, network performance, and operational data analysis for monitoring, troubleshooting, issue diagnosis, and management reporting.
- Analyzed traffic patterns, carrier performance, usage behavior, and service indicators to support operational visibility and network performance monitoring.
- Worked on international IP call operations, route testing, Wireshark-based troubleshooting, carrier integration, routing, and call failure investigation.

Education & Professional Certifications**Military Institute of Science and Technology (MIST)**

B.Sc. in Computer Science and Engineering; CGPA: 3.12/4.00

Jan 2014 – Feb 2018

Dhaka, Bangladesh

Barisal Cadet College

Higher Secondary Certificate, Science; GPA: 5.00/5.00; Board Scholarship

2013

Barisal, Bangladesh

Barisal Cadet College

Secondary School Certificate, Science; GPA: 5.00/5.00

2011

Barisal, Bangladesh

SnowPro Core Certification

2023
